About Heim

In 1942, Lewis R. Heim developed the first integral rod end bearing in the United States. Since then, a tradition of technological innovation has continued at Heim Bearings with a series of improvements in the design and production of rod ends, sphericals, and unground ball bearings.

RBC Bearings, which owns Heim Bearings, manufactures bearings for applications in construction, mining, material handling equipment, mobile hydraulic systems, farm machinery, transportation equipment, automation and robotics, semiconductor, and a wide range of other industrial machinery. RBC is also a major manufacturer of bearings for critical and demanding aircraft and aerospace applications.

RBC Heim Bearings is committed to continually meeting or exceeding our customers' expectations by providing:

- Quality products and services
- On-time delivery
- Continuous development of our people, practices, and systems

For assistance with your application, contact:
